

2016-06-06 Sprint Demo Meeting notes

Date

 06 Jun 2016

Attendees

- [Margreta Silverstone](#)
- [Leonid Marushevskiy](#)
- [Vasu Srinivasan](#)
- [Pavel Khozhainov](#)
- [Faiyaz Shikari](#)
- [Kateryna Rud](#)
- [Maksym Kalynovskiy](#)
- [Pradeep Goel](#)
- [Patrick Forman](#)
- [Christopher Breining](#)
- [Jonathan Parker](#)
- [Sumant Anand](#)

Goals

- Review CWS Parent Portal

Discussion items

Time	Item	Who	Notes
	Confirm Agenda	Margreta	Confirmed
10 min	Sign In Page	Margreta / Leonid	<p>Youtube feed and Twitter</p> <p>Pradeep requested EngagePoint CWS Channel of Youtube feed with short videos for how to use the application (and other content later) -</p> <div>ADPQ-187 - As parent I want to see video that will describe Parent portal user experience TO DO</div> <p>Faiyaz asked about documented decisions, see 09. Decisions made</p> <p>After the registration, the Sign In page cookies were defaulting to the wrong information.</p>
10 min	Registration	Margreta / Leonid	<p>Pradeep - Backlog - suggest a username. (feedback - check if available - green or not available, system suggestion)</p> <p>Pradeep - provide password tips (password rules)</p> <p>Pradeep - identify optional / mandatory fields</p> <p>Pradeep - unclear page while waiting for the email with the final registration steps</p> <p>Discussion regarding use (or not) of social network to support the registration and login process (User feedback identified concerns with the approach so not supported in current build).</p>

10 min	Inbox	Margreta / Leonid	<p>Pradeep - Mary Jenkins - Welcome message of the service and person to contact (link to Mary's email). Formatting on the message could be improved.</p> <p>Pradeep: Include a link in the welcome message to start the Search for a facility.</p> <p>Pradeep - language recommendation on calling the feature a "secured inbox"</p> <p>Pradeep - given read level - recommend the Compose - Label name change to Write</p> <p>Pradeep - Character limit - not symbols - dynamic part - compose message to the person when they start. can filter with this person</p> <p>For demo, see Mary (caseworker) inbox, not primary user role and the worker may use other communication channel integration, but shows the communication from the biological parent (needs to display the parent name, not her name in the message box).</p>
10 min	Facility	Margreta / Leonid	<p>Leonid - facility viewer - all facilities around - pop up to start the search - Leonid did not enter an address in his registration process so now the system asks the user - need filler text for the search</p> <p>Leonid - sorted by distance - can expand a group if cannot see difference - expand and - zoom in and out is interacting with the list -</p> <p>Pradeep - show sorted by distance - Labels for the filters (all types) - need better labels - search by facility data - search near this address - search by facility information, all, agency - consistent terminology (search by facility / type / status)</p> <p>Reset filters in an odd location - Pradeep</p> <p>Pradeep - One more feature - ask about - static text blocks - maybe some fillable fields - the label for the button is not clear - change to Ask Caseworker (not Ask About)</p>
10 min	My Profile	Margreta / Leonid	<p>Pradeep - show optional and mandatory fields</p> <p>Pradeep - make gender optional or remove or add categories (including prefer not to answer)</p>
10 min	Responsive UI	Leonid	<p>Responsive UI - mobile - moved the size of the screen - in process - still working on the mobile - compose does not show "inbox".</p>
5 min	Next Steps	Margreta / Leonid	<p>Additional Usability Testing</p> <p>Finalization of documents - GitHub - short video - orientation - video clip - Do a user story video - compile</p> <p>QA and Deployment - Amazon cloud - schemas of deployment / according to technologies, Show handling volume</p>

Action items

- ☐ [Pavel Khozhainov](#) - create JIRA tickets for all identified recommended improvements
- ☐ [Vasu Srinivasan](#) - support the creation of a CWS specific channel for EngagePoint on YouTube, have how the application works - video - EngagePoint channel - [Margreta Silverstone](#) (plan is to record WebEx and convert to a video)
