

## 08. Irina - 06/01/2016 - UI feedback

As a plain user who has never seen the application.

Some BA background. No Foster family connection.

Level of input quality - **moderate**.

2 Axure versions are compared:

#2 <http://2cm36s.axshare.com/login.html> (password: 123654789)

and

#4 <http://7wxot.axshare.com/login.html> (password: 123654789)

Scenario is taken from [Usability testing](#)

### User output:

#### Navigation & Usability

She prefers Prototype #4. At the same time, she thinks that both can be implemented for mobile device.

#### Profile

Please do not use SSN - better to ask about 4 last digits.

#### Facilities

N/A

#### Inbox

Same UI. Reply button is unclear. 3 levels of group/single message operations are not clear. Contact panel is good - useful feature to create new messages directly from the contact list.
