2016-06-07 Retrospective

Date	📅 07 Jun 2016
Participants	Leonid Marushevskiy Oleg Korneychuk Alexander Sankin Alexander Serbin Dmitry Rudenko Serge Redchuk Dariia Iarmuratii Yevhen Sirotin Oleksandr Nikitin Angelina Shcherbatiuk Dmytro Balym Oleksander Kuznetsov

Retrospective

What did we do well?

- Was able to increase team velocity and close more story points then previous sprint
- Deployment engineers was able to setup infrastructure in Amazon

What should we have done better?

- Took long time for approval to register Amazon account. Next time need to find out more effective way to solve this type of requests
- Was not able to finish responsive UI in the sprint. Need to be more careful on estimates next sprint
- Some stories combines several features and can be separated to more granular stories
- This sprint we had small dis-balance between front end development and back-end development due to vocation of one front-end developer. Front end developers was not able to deliver enough artifacts for back-end development.

Actions

- ☐ Leonid Marushevskiy make sure we have enough front end developer resources to maintain the right balance in next sprints
